Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Specification***

The specification is objected to because of the following informalities: This application does not appear to be a division of Application No. 09/850,545 filed 05/07/2001 which became U.S. Patent No. 6,828,134. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." This pending application of 10/791,492 is not claiming a distinct and independent invention. Application No. 10/791,462, elected claims 15-23 of applicant's election/restriction response of 11/01/2006, are drawn to a similar claimed invention of claims 1-14 of U.S. Patent No. 6,828,134. Thus, since Application No. 10/791,462 elected claims 15-23 appears to be of a similar scope of claims 1-14 of U.S. Patent No. 6,828,134, Applicant should amend his or her specification to state that Application No. 10/791,462 is a "continuation" of Application No. 09/850,545 instead of a "division" of Application No. 09/850,545.

Claims 15-23 will be examined on the merits.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1655

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Please note since Application No. 10/791,462 does not appear to be a division of Application No. 09/850,545 filed 05/07/2001 which became U.S. Patent No. 6,828,134, claims 15-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,828,134.

Although the conflicting claims are not identical, they are not patentably distinct from each other because in both cases, the claims are drawn to a method of preparing a compound of the formula comprising enzymatically resolving of a compound of the formula wherein the alkyl, alkenyl or alkynyl groups are optionally substituted by one to three halo, in the presence of a lipase and an aqueous buffer solution and (b) reacting the compound of formula IV so formed wherein R1 is as defined above, with a base in the presence of a polar protic solvent.

Further, the instantly claimed invention encompasses the claimed invention of 6,828,134.
